# Bhoomi Gupta

imbhoomigupta@gmail.com | GitHub | LinkedIn | Portfolio

## EDUCATION

| Course | College / University | Year | CGPA / % |
|---|---|---|---|
| B.Tech (ICE) | Netaji Subhas University of Technology, Delhi | 2024–2028 | 7.41 |
| CBSE Board (Class XII) | Amity International School, Pushp Vihar | 2024 | 94.4% |
| CBSE Board (Class X) | Amity International School, Sector 46, Gurugram | 2022 | 99.4% |

## INTERNSHIP

- **Genpact – Agentic AI Intern** | **Gurugram** **June 2026 – Aug 2026**
  - Built full-stack AI applications using **Python, React, Azure OpenAI**, and APIs, implementing LLM integration, asynchronous workflows, API orchestration, and enterprise automation.
  - Developed a multi-agent **Balance Sheet Reconciliation System** with specialized autonomous agents, contextual state, task decomposition, and orchestrated workflows for complex reconciliation tasks.
  - Contributed to a production-grade **Agentic Failure Monitoring & Auto-Triage System** using **Azure OpenAI GPT-5.5, ArcadeDB OKG, SQL Server**, and enterprise workflow orchestration; integrated Knowledge Graphs with LLMs for contextual retrieval, root-cause analysis, confidence-aware remediation, and autonomous decision-making.
- **RITES Limited – IT Intern** | **Gurugram** **May 2026 – July 2026**
  - Built a full-stack **Executive Health Checkup (EHC)** system using **React.js, Node.js, and SQL Server**, deployed for organizational use with integration into existing **SAP systems**.
  - Designed production-grade **RESTful APIs**, normalized database schemas, and responsive dashboards for executive health checkup records and workflows.

## PROJECTS

- **DSABuddy – Placement Preparation Platform** GitHub
  - Built a full-stack **PERN** platform serving **1000+ college users**, featuring live leaderboards, company-wise interview preparation, interview forums, and DSA progress tracking.
  - Developed the **Sheets** module by scraping and structuring LeetCode + GFG links; engineered Company Mines, onboarding flows, and a **Multer + Cloudinary** media pipeline using **Tailwind CSS + ShadCN**.
- **Wajah – Pollution Control Room with Closed-Loop Verification** GitHub | Live
  - Built a serverless **AWS** platform (**SAM**) that monitors **37 Delhi stations** hourly with **EventBridge** + **Lambda**, diagnoses spike causes using sensor and **NASA FIRMS** data, and runs each work order through **Step Functions**, **SNS**, **DynamoDB** and **S3** to verify the fix with sensor data 3 hours later.
  - Built a Hindi/English AI assistant with the **Strands Agents SDK** (9 data tools, **Bedrock**-ready); stress-tested the verification method and published its false-success rate of **1 in 5**.
- **WorkMark – AI-Powered Micro-Internship & Skill Verification Platform** GitHub
  - Architected a **MERN** platform for companies to post micro-tasks and students to submit work, with **JWT**-based role access, bcryptjs authentication, and MongoDB schemas.
  - Integrated **Azure OpenAI (GPT-4)** to evaluate submissions and generate structured skill-verification scores, per-skill breakdowns, resume bullets, and plagiarism risk.

## POSITIONS OF RESPONSIBILITY

- **General Secretary** | **The Debugging Society, NSUT**
  - Spearheaded MERN stack project development, driving architecture decisions and code quality standards; managed recruitment cycles and conducted structured technical interviews.
  - Planned and executed large-scale hackathons as Event Lead, coordinating cross-functional teams from ideation to delivery.
- **Joint Secretary** | **IEEE NSUT** · **Core Member** | **TEDxNSUT**
  - Co-organized flagship hackathons at NSUT Tech Fest and Delhi MCD HQ; led member recruitment, event ideation, and end-to-end execution of technical initiatives.
  - Coordinated speaker outreach, managed public relations, and supported on-ground event execution for TEDxNSUT.

## ACHIEVEMENTS

- **Adobe Express Add-ons Hackathon – Grand Finalist:** Built **Epsilon**, an AI add-on for real-time brand compliance scoring and automated design correction in Adobe Express. Add-on | Website
- **DTU brAInwave'24 – Semi-Finalist:** Developed **Medeliver**, an AI-enabled pharmacy and teleconsultation app with chatbot-driven prescription workflows.
- **Amazon Hack On 2026:** Ranked among the **Top 75 coders**.
- **Flipkart GRID 8.0 – Semi-Finalist.**

## TECHNICAL SKILLS

- **Languages:** C, C++, JavaScript, TypeScript, Python **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, shadcn/ui
- **Backend:** Node.js, Express.js, REST APIs, JWT auth **Databases:** MongoDB, PostgreSQL, MySQL, SQL Server, ArcadeDB
- **Core CS:** DSA, OOP, DBMS, OS, CN **Tools:** Git, GitHub, Bash/Linux, Postman, VS Code, Azure OpenAI, Automation Edge, AWS
